**Front-end (react) developer** – that is what I have been going with confident small steps the past 2 years. Daily work on yourself, pumping my skills, learning English and reading technical literature helps me get closer to my goal every day. Easy? No. Nevertheless, I am ready for difficulties. Ready to learn and develop. Now I am writing with some projects to demonstrate and consolidate my skills. Its underway - the functionality is expanding, errors are being fixed.
