Interests

- foreign languages
- family
- codewars, habr, stackoverflow
- reading books
- doing sport
- travelling
- healthy way of life
- sweets and coffee ☺

Front-end (react) developer – that is what I have been going with confident small steps the past 2 years. Daily work on yourself, pumping my skills, learning English and reading technical literature helps me get closer to my goal every day.
Easy? No. Nevertheless, I am ready for difficulties. Ready to learn and develop. Now I am writing with some projects to demonstrate and consolidate my skills. Its underway - the functionality is expanding, errors are being fixed.

In Poland, I have a permanent place of residence with access to work like local residents. I am a hardworking and goal-oriented person with a great motivation to achieve high results and become a highly qualified professional.

My main goal at work is to do more than anyone expects from me and grow as a professional together with the company. I would like to join your team and I believe that together we will be able to make this world a better place.
